FUELAID OPTIMIZER

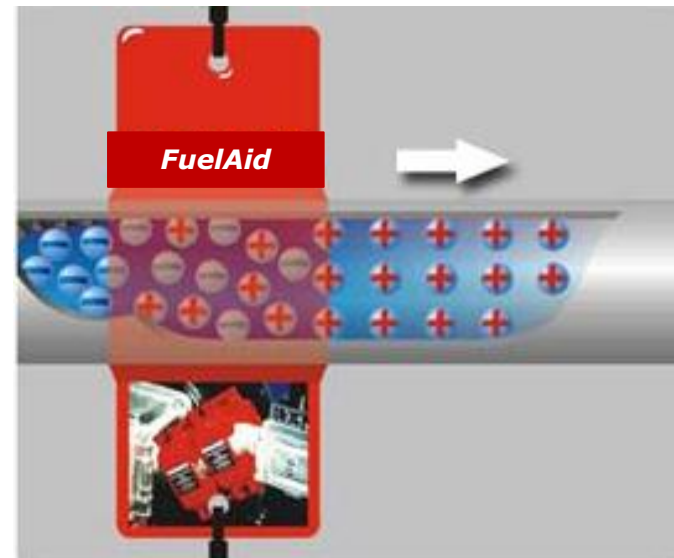

Reduces Emissions - Saves Money - Increases Power

FUELAID OPTIMIZER

The FuelAid System & Optimizer is a patented, highly engineered system that increases combustion efficiency for savings, increases horsepower, and dramatically reduces emissions.

The system energizes the engine for better performance and longer running, by converting para-hydrogen to ortho-hydrogen. This technology, used worldwide, uses NASA ortho-hydrogen modified rocket technology to atomically atomize and energize the fuel for explosively increased combustion efficiency and savings.

FUELAID OPTIMIZER APPLICATIONS

FuelAid Systems enhance the performance of any engine using any of the following hydrocarbon fuel.

- Liquid Propane Gas
- Bio-diesel
- Ethanol
- Gasoline
- Petrol
- Diesel

tractors • trucks • fairway mowers • rough mowers • green mowers • backhoes • bull dozers • scrapers • shuttle buses cars • furnaces

FUELAID OPTIMIZER BENEFITS

- ⌚ 10% - 20% average fuel savings
- ⌚ 5% - 15% increase in horsepower
- ⌚ No more premium gas - high octane performance with lower octane fuel
- ⌚ 50% - 95% reduction of Carbon Monoxide and Hydrocarbons
- ⌚ Engine runs cleaner and therefore oil lasts longer
- ⌚ Improved performance, quicker starts and faster running
- ⌚ Maintains cooling system efficiency
- ⌚ Stops scale build up and corrosion in engines
- ⌚ Healthier air and less smog
- ⌚ Suitable for all gas and diesel

Up to 20% fuel savings
